Project Title: Ritchie Valens Website

I would like to build this site as multiple pages with a navigation bar that directs you to different categories of information for the musician Ritchie Valens. I think there is enough content, I would want to find more pictures on google.

## **Home Page**

- Brief overview of info on Valens

## **Early Life**

## **Career**

## **Winter Dance Party Tour + “The Day the Music Died”**

- Final touring show, and his death

## **Legacy**

## **Discography**

## **Sources**

- Sources page for info and photos.
